HPE ProLiant DL360 Gen10 Server

1 Drive Bays

2 HPE Smart Storage Battery

Fan cage shown with 7 standard Hot-plug fans
(High Performance temperature fans optional)

3 3 3

Memory (DIMMs)

4 Processor CPU 1

4 Processor CPU 2

5 HPE Smart Array

6 Chassis Intrusion Detection Connector

7 PCIe Slots

7 PCIe Slots

10 Power Supplies

8 FlexibleLOM Option

9 iLO 5

1 SFF or
1 dual uFF SSD
(2x M.2 cartridges)
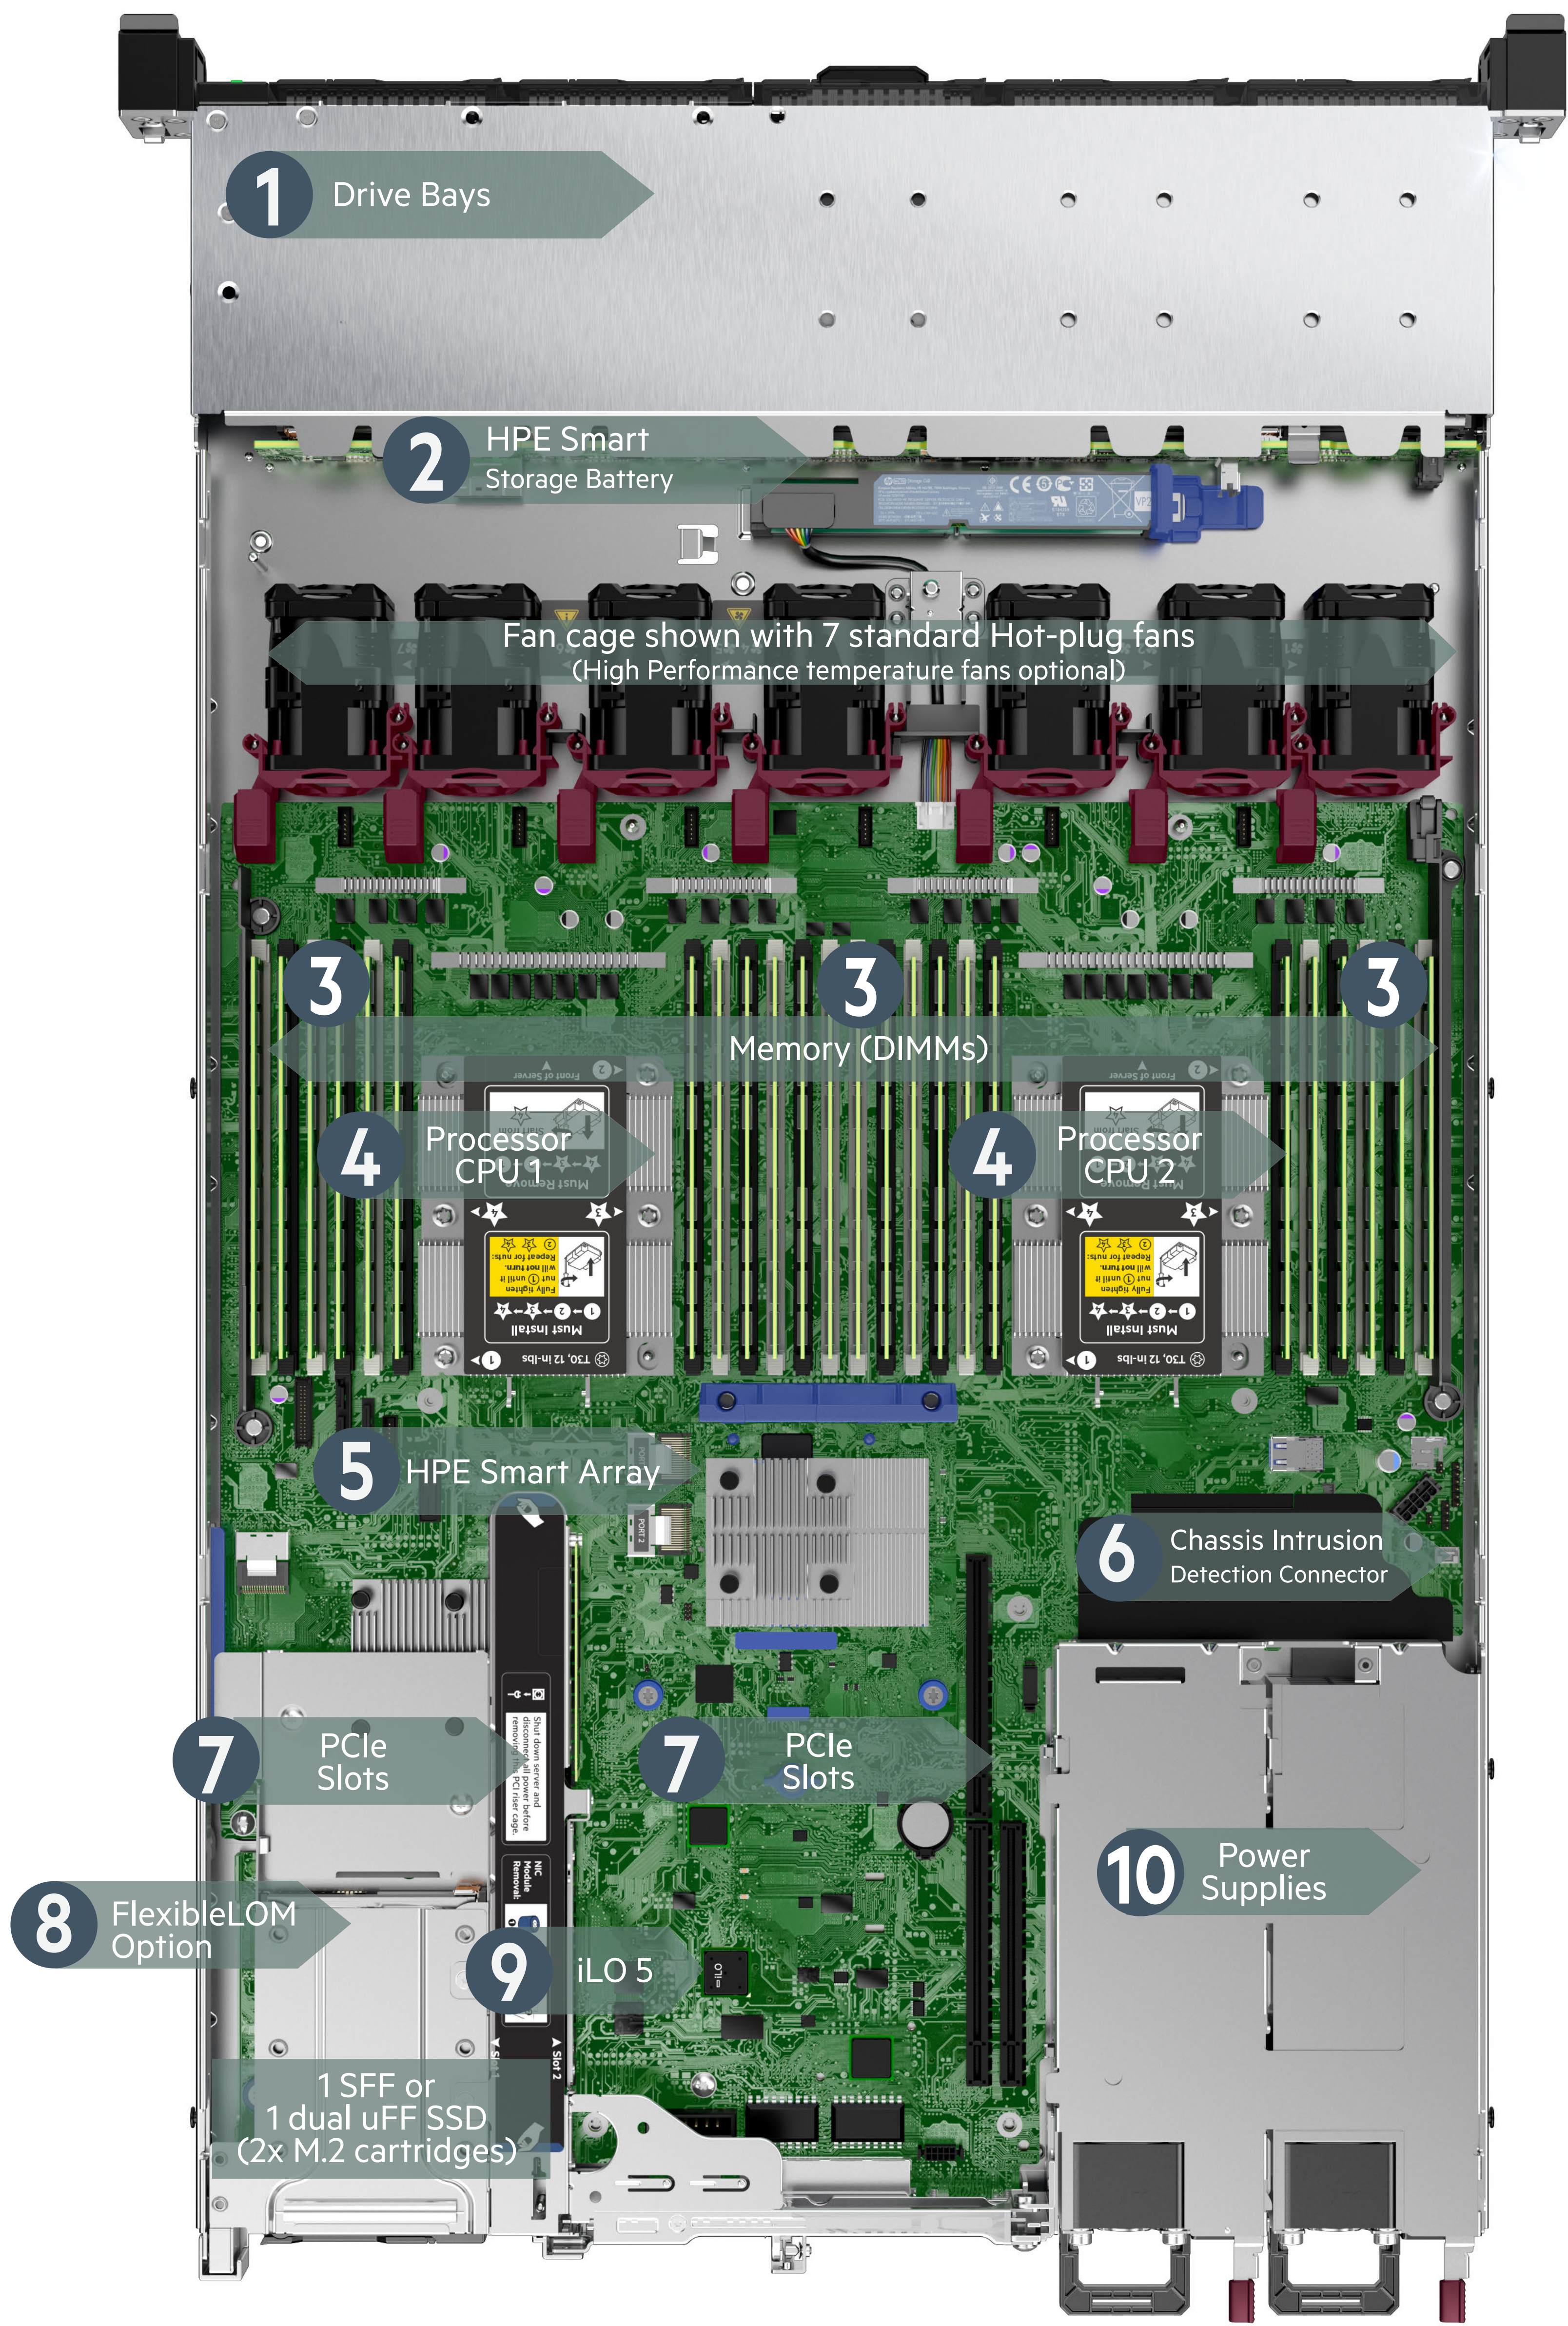

Storage	1	Up to 10 NVMe + 1 SFF / 18+2+1 SFF/ 4 LFF + 1SFF SAS/SATA HDD/SDD[2], Plus M.2 SATA or PCIe option kit, NVMe PCIe SSD & Dual uFF option kit
HPE Smart Storage Battery	2	Optional HPE Smart Storage Battery
Memory	3	Up to (24) HPE Smart Memory DDR4 (6 channels per CPU), up to 2666MT/s (3.0 TB max[3]) & Persistent memory up to 12 DIMMs
Compute	4	Up to (2) Intel® Xeon® processor Scalable family, up to 28 Cores
Smart Array	5	Standard HPE Dynamic Smart Array S100i, Choice of HPE Flexible Smart Array with Mixed Mode
Chassis Intrusion Detection Connector	6	Optional Chassis Intrusion Detection Port
PCI-Express Slots	7	Up to 3 available slot(s) for NICs, HPE Smart Array Controllers, GPU support up to 2xSW cards, etc.
iLO 5	8	iLO 5 offers standard security features & digitally signed firmware.
Networking	9	4x1GbE embedded + Choice of FlexibleLOM or Standup up to 25GbE
Power & Cooling	10	Up to 96% eff. (Titanium) w/ Flexible Slot PS

HPE Gen10 Servers are the World's Most Secure Industry Standard Servers[1]

The DL360 offers Chassis Intrusion Detection, digitally signed firmware via HPE Integrated Lights Out (iLO) 5, HPE Secure Encryption, and TPM 2.0.

[1] Based on results of penetration testing of a ProLiant Gen10 servers vs competition; [2] Not all Drive configurations are offered in the front of the server; [3] Available in 2H 2017
